ABOUT ME

Machine Learning Engineer with hands-on experience in regression, classification, clustering, deep learning, and SQL. Skilled in building and deploying end-to-end AI and machine learning solutions using Python, SQL, TensorFlow, Scikit-learn, Keras, and Streamlit. Passionate about developing AI-driven solutions to solve real-world problems and continuously exploring emerging technologies in Artificial Intelligence.

EDUCATION

Karpagam College of Engineering	Coimbatore, India
<i>B.Tech Artificial Intelligence and Data Science (CGPA: 7.60)</i>	2022 – 2026
S.B.K Hr.Sec School	State Board
<i>Higher Secondary Certificate (56.67%)</i>	2022
S.B.K Hr.Sec School	State Board
<i>Secondary School Leaving Certificate (63.00%)</i>	2020

PROJECTS

AI-Powered Multi-Agent Procurement System for Supply Chain Automation	Aug 2025 - Mar 2026
- Developed an end-to-end multi-agent system (12 agents) to automate the procurement lifecycle - Implemented ML-based demand forecasting and intelligent inventory-based replenishment - Built automated supplier discovery, RFQ generation, and quote analysis system - Integrated LLM-based document verification and decision-making with PDF report generation - Technologies: Python, LangChain, CrewAI, Groq API, Streamlit, Pandas, NumPy, FAISS, ChromaDB, ReportLab, Github	
Optimized Vehicle Routing using Genetic Algorithms	Jan 2025
- Designed an optimization solution for Vehicle Routing Problem - Reduced delivery routing cost by 25% - Improved logistics efficiency using Genetic Algorithms - Technologies: Python, Genetic Algorithms, NumPy, Pandas, Matplotlib, Google Colab, Github	
FIFA Analytics Dashboard	Jul 2024
- Designed and developed an interactive football analytics dashboard using Tableau. - Enabled visual insights for player and team performance analysis - Technologies: Tableau, Data Visualization, Dashboard Design, Github	
MLOps for Job Placement Prediction	Feb 2024 – Mar 2024
- Developed an end-to-end machine learning pipeline for predicting student job placement using a real-world Kaggle dataset. - Performed data preprocessing, feature engineering, model training, and evaluation, selecting the Random Forest model with 86.05% Accuracy, 90.32% F1-Score, and 0.93 ROC-AUC. - Built an interactive Streamlit web application for real-time placement prediction, serialized the trained model using Joblib, and containerized the application using Docker for consistent deployment across different environments. - Technologies: Python, Scikit-learn, Pandas, NumPy, Streamlit, Docker, Joblib, Git, GitHub.	

INTERNSHIP EXPERIENCE

Octanet Services	Sep 2023 – Oct 2023
<i>Python Developer Intern</i>	
- Designed and implemented an ATM Management System using Python and Object-Oriented Programming principles. - Improved transaction flow and system performance	

SKILLS

Languages: Python, SQL	
Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras, Streamlit, Joblib	
Machine Learning & MLOps: Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Hyperparameter Tuning, Text Preprocessing, Model Deployment, Model Serialization	
Deep Learning: CNN, RNN	
Tools & Platforms: Git, GitHub, Docker, Google Colab, VS Code, Tableau	

CERTIFICATIONS

Python Development Internship - Octanet services	Oct 2023
Data Analytics With Python - NPTEL	Apr 2024
Data Visualization with Power BI - Great Learning	Aug 2024
Introduction to MongoDB - MongoDB	Sep 2024
Business Analysts Qualification - Qlik Sense	Oct 2024
